## PERSONAL SUMMARY

Software Engineer passionate about mobile app development and full project lifecycle management, with a keen interest in translating Figma designs into mobile applications down to the finest details.

## EDUCATION

### Bachelor of Software Engineering

09/ 2019 – 01/2024

University of Jeddah, Jeddah

- GPA : 4.63

## EXPERIENCE

### Tuwaiq Academy – Flutter Bootcamp Trainee

04/2025 - 07/ 2025

Riyadh, Saudi Arabia

- Completed Flutter and Dart training with a focus on Clean Architecture and Bloc for state management.
- Integrated Bloc-based apps with Supabase backends, using Postman to test and refine API endpoints.
- Collaborated within cross-functional teams, organizing sprints and tracking tasks via Jira.
- Utilized Git and GitHub for version control and collaborative development.
- Developed and managed the full lifecycle of two Flutter applications from Figma designs in two months, leveraging Clean Architecture for maintainable, pixel-perfect code

### Saudi Aramco - Information Security Intern,

07/2023 - 09/ 2023

Offshore Drilling Department (ODD) Dhahran, Saudi Arabia

- Collaborated with the Information Security Analyst (ISA) team to analyze and protect sensitive corporate data.
- Contributed to the implementation of Data Leakage Prevention (DLP) measures within SAP subsystems.
- Provided IT support for department staff, resolving technical issues and maintaining operational efficiency.
- Generated detailed reports through internal dashboards for performance and security tracking.
- Applied strong Microsoft Office skills (Excel, PowerPoint, Outlook) to support documentation and communication tasks.
- Participated in monthly team meetings, contributing to issue identification and resolution discussions.

## PROJECTS

### Graduation Project (Jsoor) | [Jsoor](#)

03/2023 – 12/2024

A team-based Flutter application that translates Arabic sign language into real-time text using machine learning and image processing. Developed to support communication for the deaf community.

#### Role:

- Led the front-end development using Flutter, focusing on responsive UI and user experience.
- Handled application testing to ensure performance, usability, and bug resolution.
- Authored and organized full project documentation using Overleaf.
- Collaborated with the team for back-end integration and agile development planning.
- Tools & Tech Used: Flutter, Dart, Python, Git, Overleaf, Agile/Scrum

## SKILLS

### Technical Skills

#### Programming Languages:

- Dart, Python ,JavaScript, Java

#### Mobile App Development:

- Flutter ,Firebase, Supabase, Testing, API

#### Web Development:

- HTML, CSS, Bootstrap

### Soft Skills

- Effective teamwork and collaboration
- Self-Motivation
- Microsoft Office App
- Time management
- Adaptability and Flexibility
- Problem solving
- Priorities
